March	40	0	17849

There were 4 surveillance inspections conducted at 4 different sites for a total of 40 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. All sites were scheduled for monthly sampling; weather prevented some of these visits. Routine harvest of market-size fish stayed on hold due to cold water and weather. The water temperatures continued to decrease in response to the colder air temperatures. There were no cages confirmed this month. All sites with fish in the water were Category 1 as of the end of the month.
